

ULTRA+SPF WINDOW TINT

REJECTS 99% OF U.V. RAYS

SHIELDS INTERIOR FROM U.V. DAMAGE

REDUCES GLARE BY 60% - DAY & NIGHT

REDUCES CABIN TEMPERATURE

Why V.I.P. Window Film?

Ultra+SPF Window Tint is designed first and foremost as a preventative measure against the damaging effects of Australia's harsh sun soaked environment.

Most sun-screen products on the market today feature an SPF (sun protection factor) benefit of 30 to 40 Plus. V.I.P.'s Ultra+SPF Window Film has an SPF rating of 100 Plus. What better way to protect you family from the damaging effects of the sun.

Providing safer driving conditions for you and your family, the technology behind the window tint film features a UV Resistant layer that blocks out 99% of harmful ultra violet rays.

Not only will this film provide a great look to your new vehicle the protection benefits will ensure the interior and upholstery maintain a new look without fading and cracking.

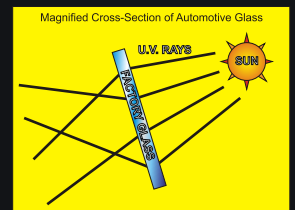

Covered by a manufacturer backed Australia Wide *Lifetime Warranty you will be safe in the knowledge your car and family are well protected.

Factory 'Stained' Glass

Without a any preventative measures, the standard glass supplied on modern vehicles is susceptible to dramatic temperature variances.

Direct contact by normal sunlight causes severe damage to the interior.

Vehicle occupants behind factory fitted glass are not protected against sunburn and skin cancers.

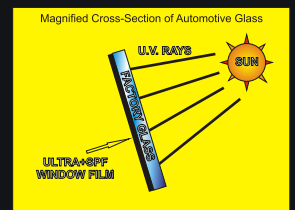

Magnified Cross-Section of Automotive Glass
Factory supplied 'stained' glass is not a preventative measure against the UV Rays from the Sun. The glass only acts to refract light and protect from wind and rain.

Ultra+SPF Window Film on Glass

Once fitted with Ultra+SPF Window Film, the factory supplied glass in your vehicle will feature a micro thin film of UV protection.

The technology used in the film construction blocks out 99% of harmful UV rays and reduced cabin temperature dramatically.

The added benefit of an all new look to your vehicle from the outside aids in maintaining re-sale value while providing great protection against the harsh Australian environment.

Magnified Cross-Section of Automotive Glass
The addition of Ultra+SPF Window Film creates a protective micro thin layer to block out 99% of harmful UV Rays. This keeps the interior cool and the occupants away from the direct sun damage that cause skin cancers.

AUSTRALIA WIDE WARRANTY COVERAGE
